

A privately owned Western Australian formwork, reinforcing and concrete construction contractor specialising in major concrete construction across the infrastructure, resources and commercial sectors.

With a proactive team that do not compromise on quality or reliability, NGALANG BENANG have the capability to deliver both major and minor works projects across Western Australia.

We believe in building solid relationships with our clients, working collaboratively to deliver sustainable projects as safely and as cost-effective as possible.

Our management team have been involved in all facets of construction with an in-depth understanding of programming, value engineering, risk mitigation and cost planning, which adds value to any project from the onset.

We believe in forming concrete relationships with our clients.

Formwork

Reinforcing

Concrete

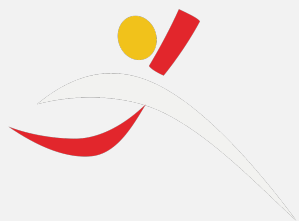

At NGALANG BENANG, our aim is to enhance, protect and conserve the local communities in which we work, to enable a sustainable future for all. We believe our people are the foundation on which we build to achieve sustained growth and development.
